

Dual 600 Ballast

At a fraction of the weight and size of other dual ballasts, the Dual Series is designed to run two 600W lights at the same time. Simplify your setup by consolidating two ballasts in to one. Like our Flip Series, the Dual Series has a patented 9-sided design to maximize surface area, reducing the need for large, heavy heat-sinks. The Dual Series does not work with the NCCS system. Like all of our ballasts the Dual Series comes with Random Start technology. Random Start uses an algorithm that will start the ballast within a 0-15 second window. This allows for less initial power draw when using multiple ballasts. All Nanolux ballasts are FCC compliant – no more RFI problems. ETL listed meeting product safety standards.

- Runs 2 600w grow lights at once!
- Diagnostic LED
- Random Start technology
- Light weight and compact design
- Comprehensive short-circuit/circuit overheat/lamp failure protection
- Dimmable lamp function: 100%-75%-50%
- Strikes both MH and HPS bulbs
- 2-year warranty
- Fan Cooled Ballast
