

Multi Voltage Testing Station

Nanolux Multi Voltage testing station with 120V input and an output option to test 120V, 240V, or 277V.

This will allow Nanolux Authorized resellers who only have 120V available to test either 240V or 277V electrical fixtures with up to 1000 watts of output.

- 120V input cord and plug
- Tests one fixture only at either 120/240/277V output. (TS-MV will trip circuit breaker if more than one output receptacle is plugged in, DO NOT PLUG IN MORE THAN 1 FIXTURE)
- Tests up to 1000W fixtures
- Front Panel mounted circuit breaker for protection from electrically shorted fixtures.

Nanolux Part Number# TS-MV
